

GEMSTONE EXPLORATION AND MINING CORPORATION (GEMC)

Presented by Rehan

Potential in Pakistan's Mineral & Gemstone Market

Unlocking Untapped Potential in a Resource-Rich Nation.

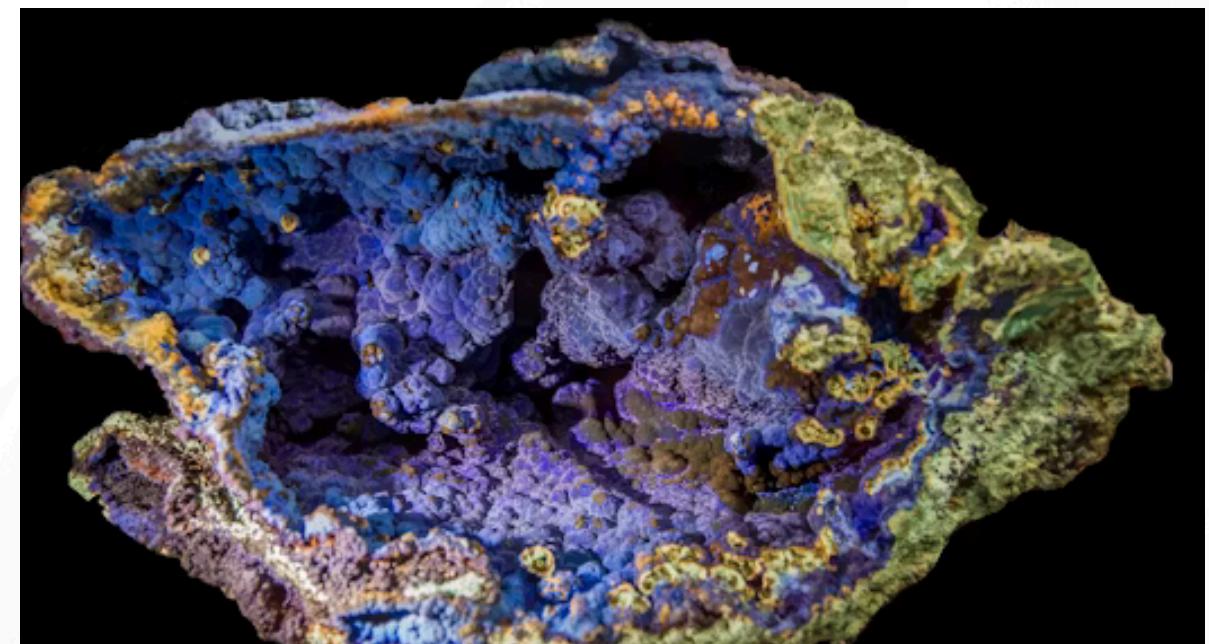

Contents

1. Overview of Pakistan's mineral and gemstone resources.
2. The problem in the current market (locals selling at low prices, lack of facilities)
3. Our strategic plan capitalizes on this booming opportunity, unlocking the vast potential of Pakistan's mineral sector.
4. Key Takeaways
- 5.

Overview of Pakistan's Mineral and Gemstone Resources

- **Industrial Minerals:** High-grade deposits of feldspar, bentonite, barite, fluorite, and coal.
- **Metal Ores:** Rich reserves of gold, copper, iron, chromite, lead-zinc, and nickel.
- **Energy Minerals:** Significant deposits of coal and uranium.

- **Precious Stones:** Emerald, ruby, aquamarine, topaz (golden and pink), and tourmaline.
- **Semi-Precious Stones:** Garnet, peridot, quartz (amethyst and smoky), chrysoprase, zircon, spinel, agate, jasper, and serpentine.
-

Problems in the Current Market

Exploitation of Local Mining Contracts in Balochistan

Decades ago, locals in Balochistan leased mining rights to the government, believing the mines held valuable resources like gold. However, due to insufficient resources, these expectations were unfulfilled. Over time, foreign companies, particularly from China, entered the market, purchasing minerals at very low prices. Locals, lacking alternatives, signed exploitative contracts that offered minimal profits, leading to significant loss and exploitation.

.

Mineral Mining Contracts and Business Opportunities

In today's market, we are often offered mining contracts for various minerals. These contracts typically involve acquiring entire mines, where we are entitled to 80-90% of the extracted material. The remaining portion is paid to locals at significantly lower rates. This presents an excellent opportunity to mine, export, and maximize profits by leveraging the difference in local and market prices.

-

Gemstone Industry Potential and Challenges

The global gemstone industry is worth billions of dollars, with high demand for jewelry, especially in neighboring countries. However, in our region, advanced technology for cutting and grading gemstones is limited to a few major cities, leading to underpricing. As a result, many local traders buy gemstones by weight from locals at low prices, then sell them for millions in national and international markets. The key barriers to maximizing profits are the lack of technology and education.

Strategic Plan to Capitalize on the Opportunity

(Initial Phase)

- **Direct Mining Operations:** Establish direct mining operations in Balochistan, leveraging existing connections to extract high-quality minerals.
- **Gemstone direct purchase:** Directly purchase gemstones from locals
- **Export:** Export extracted minerals.
- **Client Acquisition:** Client hutting to increase demand

- **Administration:** Establish an administrative system.
- **Lab Testing and Research:** Outsource lab testing and research.
- **Gemstone Polishing and Sales:** Polish gemstones through external services and sell them in local and international markets.

•

(Middle Phase)

- **Scaling Up Operations:** Secure large deals, acquire large mining areas.
- **Machinery and Equipment:** Purchase machinery and equipment.
- **In-House Lab Testing:** Establish in-house lab testing facilities.
- **Gemstone Polishing Setup:** Establish an in-house gemstone polishing setup.
- **Bulk Gemstone Purchase:** Purchase gemstones in bulk quantities.

- **Refining and Value Addition:** Establish refining and value addition facilities.
- **Technology Adoption:** Adopt latest technologies, including value management technology.
- **Expansion:** Expand the business.
- **Diversification:** Diversify the business.
- **Gemstone Marketing and Sales:** Utilize effective marketing strategies to sell polished gemstones in local and international markets.

Key Takeaways

- **High Return on Investment:** This business has the potential to multiply your investment several times, resulting in high returns.
- **Low Competition:** The market has relatively low competition, making it easier for you to establish yourself.
- **Excellent Opportunity:** This business presents an excellent opportunity for growth and expansion
- **Outsourcing Options:** You can outsource certain tasks, allowing you to focus on growth and expansion.

- **Rapid Growth:** This business has the potential for rapid growth, allowing you to quickly increase your investment.
- **Minimal Risk:** The business carries minimal risk, ensuring the security of your investment.
- **Long-Term Returns:** This business can provide long-term returns on investment, ensuring sustained growth and profitability.

Thank you.
